

Exhaust System Technician

We are a busy, locally-owned shop known for quality work and honest service. Our team takes pride in what we do, whether it's basic maintenance or advanced diagnostics. Due to high customer demand, we're looking to add an **Exhaust System Technician** to join our team.

Job Overview:

We're looking for a dependable, skilled **Exhaust System Technician** to join our team. You'll be responsible for diagnosing, repairing, and maintaining a wide range of vehicles with a focus on quality, safety, and customer satisfaction.

We're looking for someone who knows their way around exhaust systems, both factory and custom. If you can weld, bend pipe, troubleshoot rattles and leaks, and build an exhaust system that sounds just right, we want you to join our team.

Key Responsibilities:

- Repairing or replacing exhaust components (mufflers, catalytic converters, pipe, etc.)
- Fabricating and installing both custom and direct fit exhaust systems including, bending and fitting pipe, making sure everything is tight and clean
- Communicate effectively with service advisors about repair timelines
- Maintain an organized and clean work environment, and ensure all work complies with industry safety standards and shop protocols

Qualifications:

- Positive attitude and strong work ethic
- A minimum of two (2) years of hands-on experience with automotive work
- Demonstrated welding and fabrication skills, including MIG welding
- Ability to work independently as well as in a team, and manage time efficiently
- Valid class G drivers license with a clean abstract

What We Offer:

- Competitive hourly wage (based on experience)
- A respectful, supportive team environment where your work is valued
- Monday–Friday schedule (no weekends!)
- Uniforms and safety equipment provided
